Dust-extracted sanding before painting

HOW WE HANDLE A REPAIR

From site visit to finished repair.

01 Site visit

We inspect the damaged area and check surfaces, moisture and timber before scoping the work.

02 Written scope & quote

A clear written quote setting out the repairs and the paint system for the affected areas.

03 Repair & preparation

Plasterboard replaced, stopped, skimmed, sealed and stain-blocked, with HEPA dust extraction.

04 Repaint & handover

Finished in Resene or Dulux systems, then a walkthrough of the completed work with the homeowner.

EQUIPMENT

- Graco Ultra Max airless sprayers
- Festool PLANEX LHS 2 & Rotex RO90 sanders
- Festool CTM 36 M-Class HEPA extractors
- Kärcher petrol water blaster
- EWP Silvercard certified operators

CEILING & WALL REPAIRS

A sound repair, then a clean finish.

Replacing plasterboard · Epsom

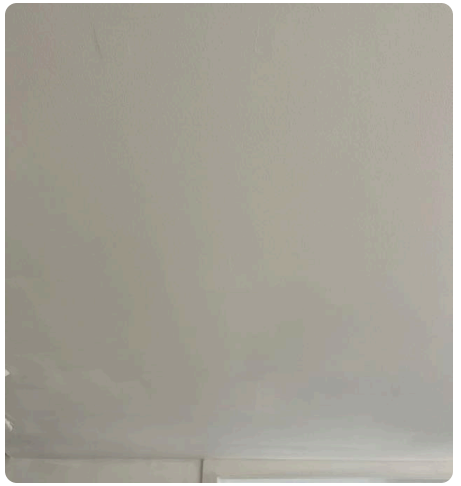

01 Damaged ceiling opened up

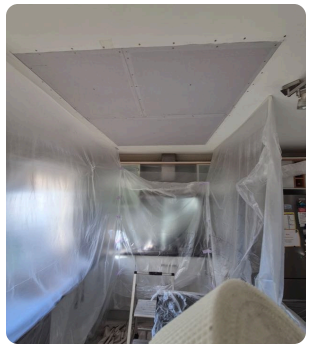

02 New plasterboard fitted

03 Stopped and skimmed

04 Sanded, sealed and painted

Plastering & painting · Remuera

Repairs and repainting in a lived-in home, with the kitchen fully masked.

> Festool PLANEX LHS 2 and Rotex sanders run through M-Class HEPA dust extractors, so fine dust is captured at the tool.

MATCHING EXISTING FINISHES

Repairs that sit with the rest of the room.

The aim of a claim repair is a finish that blends with the surfaces around it.

01 The right paint system

Resene and Dulux systems for each surface: walls, ceilings, woodwork, plaster or timber.

02 Sealing & stain blocking

Repaired areas and marked surfaces are sealed and stain-blocked before painting.

03 Plaster & stopping

Plasterboard replaced, stopped and skimmed by the same team that paints, so one contractor covers the repair.

04 Inside and out

Ceilings, walls, trims, weatherboards, plaster, roofs and timber, by one team.
